SKILLS

- **Languages:** Python, C, Java, C++, JavaScript
- **Frameworks:** HTML and CSS, Bootstrap, React, Django, Flask
- **Tools/Platforms:** Git, MySQL, PostgreSQL, Visual Studio Code, Wireshark
- **Soft Skills:** Adaptability, Analytical Thinking, Problem-Solving, Team Collaboration

PROJECTS

Inventory Management System | GitHub

Feb' 26

- Developed a secure web-based Inventory Management System with user authentication and session management using Flask.
 - Implemented full CRUD operations for product management (add, update, delete, view) with category, pricing, quantity, and expiry tracking.
 - Integrated PostgreSQL with SQLAlchemy ORM and used environment variables for secure configuration.
- Tech Stack:** Python, Flask, SQLAlchemy, PostgreSQL, HTML5, Bootstrap

Food Ordering System – Restaurant Ordering and Management Platform | GitHub

Jul' 25

- Developed a high-performance C++ Food Ordering System using DSA (hash tables and vectors) and modular OOP architecture, achieving O(1) average menu lookup and stock updates.
 - Implemented layered backend design (data, business logic, UI) with manager controls, customer ordering, receipt generation, and real-time popular item tracking.
 - Improved system reliability and scalability by adding centralized input validation, error handling, and optimized data structures.
- Tech Stack:** C++, Data Structures & Algorithms (DSA)

TRAINING

Advanced Data Structure | Link

Jun' 25 - Jul' 25

- Completed the online skill development course offered by Center of Professional Enhancement (LPU) by securing an A grade.
- Built a console-based C++ Food Ordering System using DSA with manager and customer features.

CERTIFICATIONS

- Computational Theory: Language Principle & Finite Automata Theory - Infosys Springboard | [Link](#) Aug' 25
- Java Programming - Iamneo | [Link](#) May' 25
- Object Oriented Programming - Iamneo | [Link](#) Dec' 24
- Data Structures and Algorithm - Iamneo | [Link](#) Dec' 24
- Computer Communications - Coursera | [Link](#) Nov' 24
- The Bits and Bytes of Computer Networking - Coursera | [Link](#) Sep' 24
- Introduction to Hardware and Operating Systems - Coursera | [Link](#) Sep' 24

EXTRA CURRICULAR

- Built a computer vision app with Azure Cognitive Services – An online non-credit project authorized by Microsoft and offered through Coursera | [Link](#) Dec' 25
- Participated in the Build a Thon Hackathon conducted by Board Infinity | [Link](#) Mar' 24

EDUCATION

- **Lovely Professional University**
Bachelor of Technology - Computer Science and Engineering; **CGPA: 6.89** Phagwara, Punjab
Aug' 23 – Present
- **GOVT. H S S Parambil**
Intermediate; **Percentage: 89%** Kozhikode, Kerala
Jun' 19 – May' 21
- **GOVT. H S Payambra**
Matriculation; **Percentage: 91%** Kozhikode, Kerala
Jun' 17 – May' 18
